Communication Expansion Module (Ethernet communication)

net communication) Model: QMC1-MT

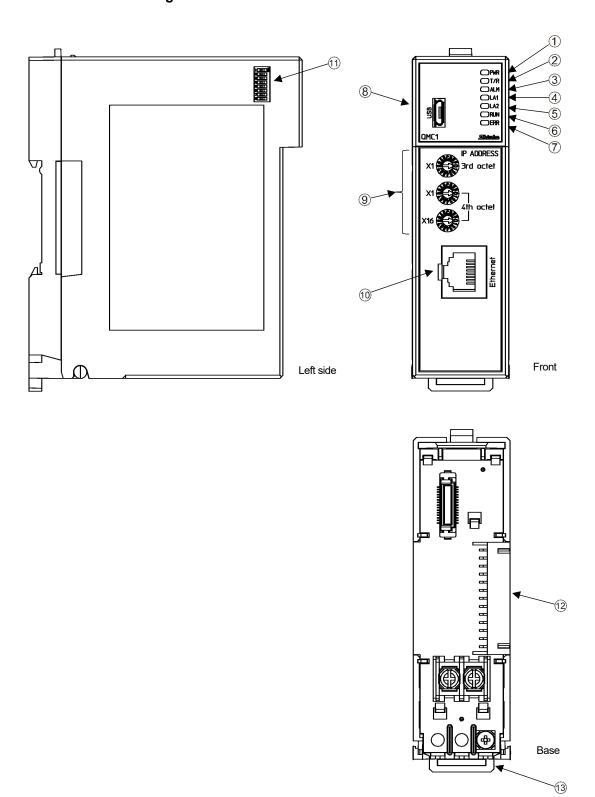

■ Model

QMC1 - MT

■ General Structure

Weight	Approx. 140 g		
Dimensions	30×100×85 mm (W×H×D)		
Mounting method	DIN rail mounting type		
Case	Flame-resistant resin, Color: Black		
Panel	Polycarbonate sheet		
Applicable standards			
	EN EN61010-1		
		(Pollution degree 2)	
	EC Directive EMI: EN61326		
		Radiated interference field strength: EN55011 Group1 ClassA	
		EMS: EN61326	

■ Indication Structure / Settings Structure

Operation indicator

No.	Symbol (color)	Name and Function		
1	PWR (Green)	Power indicator (*1)		
		Lights off (always): No power supply to the instrument.		
		Lights up (always): Power supply to the instrument.		
		Flashing (500 ms lights up/500 ms lights off):		
		Non-volatile IC memory error.		
2	T/R (Yellow)	Communication indicator (*1)		
		Lights off (always): Ethernet communication error (no response) or USB communication.		
		Flashing (slow): Ethernet communication error (reception error).		
		Flashing (fast): Ethernet communication is normal.		
3	ALM (Red)	Alarm indicator (*1)		
		Lights up (1 sec.): When communication with the slave [control module (QTC1-□)] is error. (*2)		
		Flashing (250 ms lights up/250 ms lights off):		
		When power is supplied from a PC via USB.		
4	LA1 (Yellow)	Link indicator (LA1)		
		Lights up (always): When link is established.		
		Lights off (always): When link is not established.		
(5)	LA2 (Yellow)	Link indicator (LA2)		
		Always lights off		
6	RUN (Green)	Line connection indicator (*1)		
		Lights up: When Ethernet connection.		
7	ERR (Red)	Communication error indicator (*1)		
		Lights off (always): No errors.		
		Lights up (1 sec.): When communication error occurs in SLMP communication (*3) of Ethernet.		
		(e.g.) When data outside the setting range is sent from the PLC The ERR indicator lights up for		
		1 second in response to a negative-acknowledgement from the connected module.		

- $({}^\star 1) \hbox{:} \quad \hbox{Each operation indicator (except LA1 and LA2) lights up sequentially during warm-up after power-on.}$
- (*2): Does not light up in the SIF function.
- (*3) Communication protocol for Mitsubishi Electric Corporation PLC MELSEC.

Switch and connector

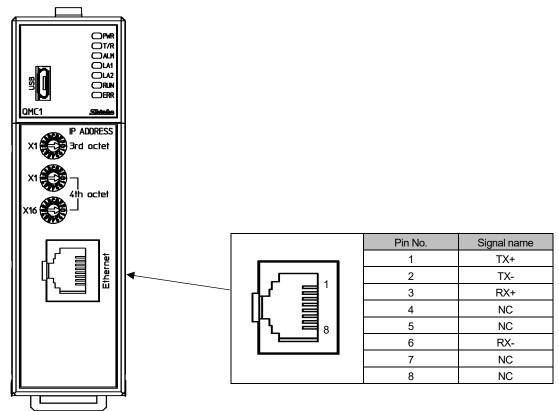

No.	Symbol	Name and Function	
8	USB	Console communication connector	
		Connector for console communication tool cable.	
9	IP ADDRESS	QMC1-MT IP address setting rotary switch	
10	Ethernet	Ethernet communication connector [Modular jack (RJ45)]	
11)		DIP switch	
		Not used in this instrument. Please leave all switches OFF.	
12		Connector	
		Connector for connection to control module QTC10.	
13		Lock lever	
		Lever for fixing or releasing when mounting or dismounting on a DIN rail.	

Setting Structure

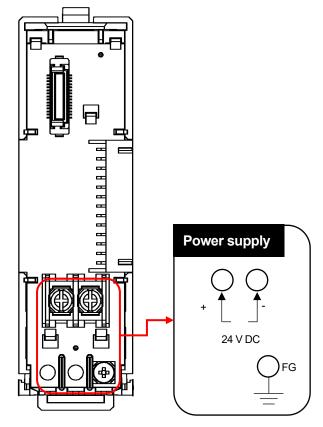

QMC1-MT IP address setting Set the third and fourth bytes of the QMC1-MT IP address using a rotary switch.	
--	--

■ Pin Assignment and Terminal Arrangement

Pin Assignment of Ethernet Communication Connector

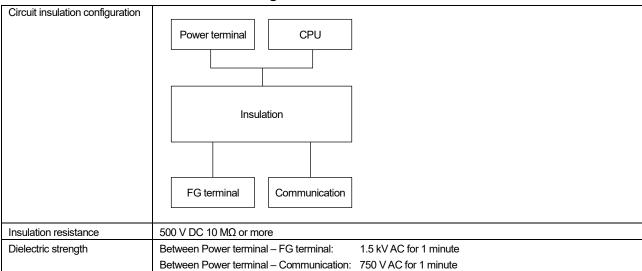

Power supply terminal and FG terminal arrangement

■ Standard Functions

Ethernet communication	Connects to the control module (QTC1) for Ethernet communication (MODBUS/TCP or SIF function). MODBUS/TCP		
	Physical layer	10BASE-T/100BASE-TX automatic recognition	
	User layer	MODBUS/TCP Number of connections: 1	
SIF function (Smart	This function reads and writes various data to PLC registers using the communication protocol of Mitsubishi		
InterFace, programless	Electric Corporation's PLC MEL	SEC.	
communication function)	User layer	TCP/IP	
		Mitsubishi Electric Corporation PLC MELSEC Communication Protocol	
		Frame: QnA compatible 3E frame (SLMP 3E frame)	
		Code: Binary or ASCII	
		Connectable PLC: 1 unit	
Module-to-module			
communication	Communication line	Internal Bus	
	Communication method	Half-duplex communication	
	Synchronization method	Start-stop synchronization	
	Communication speed	57600 bps	
	Data bit/Parity/Stop bit	Data bit: 8	
		Parity: Even	
		Stop bit: 1	

■ Insulation Resistance and Dielectric strength

■ Communication interface

Ethernet communication	10BASE-T/100BASE-TX automatic recognition	
Between modules	Internal bus	

■ Environmental Conditions

Ambient temperature	-10 to 50 °C (no condensation or freezing)	
Ambient humidity	35 to 85 %RH (no condensation)	
Altitude	2,000 m or less	
Installation environment	Pollution Degree 2 (according to EN61010-1)	
Memory protection	Non-volatile IC memory (write cycles: 1 million)	
Environmental specification	RoHS directive compliant	

■ Attached Functions

Power failure countermeasure	The setting data is backed up in the non-volatile IC memory.		
Watchdog timer	Monitors program runaway and halt with a watchdog timer, and resets the MCU and the instrument to the		
	initial state when an abnormality is detected.		
Warm up indication	After power-on, each operation indicato	r (except LA1 and LA2) lights up sequentially.	
Total energizing time	It can check the time that the power is o	n.	
measurement function	If the accumulated time exceeds 65535 hours, it will be added from 0 hours.		
	It can grasp the approximate usage time from the accumulated time. However, since the save cycle is 1		
	hour, the time within 1 hour may not be saved due to a power failure.		
	Total energizing time: 1 hour/count		
Console communication	Connect USB communication cable (commercial item) to the console communication connector, and the following operations can be performed from an external computer using the console software (SWC-		
	QMC101M).		
	(1) Reading and setting items required for Ethernet communication (protocol selection, QMC1-MT IP		
	address setting, etc.)		
	(2) Operation status reading		
	(3) Read and set the each setting value of the SIF function(4) Change of function		
	Communication protocol Shinko protocol		
	Communication cable	USB - micro USB Type-B (commercial item)	
	Software	Console software (SWC-QMC101M)	
Firmware update function	Connect USB communication cable (co	mmercial item) to the console communication connector, and the	
	firmware can be updated from an external computer using the console software (SWC-QMC101M).		

■ Other

Power supply voltage	24 V DC Allowable fluctuation range: 20 to 28 V DC	
Power consumption	4 W or less	
Rush current	Max. 10 A	
Accessories included	Mounting and wiring instruction manual: 1	
	Power supply terminal cover: 1	
Instruction manual	Please download the full Instruction Manual from the Shinko website.	
	https://shinko-technos.co.jp/e/	

■ Dimensions (Scale: mm)
