## PULSE-ANALOG TRANSMITTER SGJ SGJW SGJL INSTRUCTION MANUAL

## Preface

Thank you for purchasing our SGJ, SGJW or SGJL, Pulse-Analog Transmitter. This manual contains instructions for the mounting, functions, operations and notes when operating the SGJ, SGJW or SGJL. To prevent accidents arising from the misuse of this instrument, please ensure the operator receives this manual.

## Notes

- This instrument should be used in accordance with the specifications described in the manual. If it is not used according to the specifications, it may malfunction or cause a fire.
- Be sure to follow the warnings, cautions and notices. If they are not observed, serious injury or malfunction may occur.
- The contents of this instruction manual are subject to change without notice.
- Care has been taken to ensure that the contents of this instruction manual are correct, but if there are any doubts, mistakes or questions, please inform our sales department.
- This instrument is designed to be installed on a DIN rail within a control panel. If it is not, measures must be taken to ensure that the operator does not touch power terminals or other high voltage sections.
- Any unauthorized transfer or copying of this document, in part or in whole, is prohibited.
- Shinko Technos Co., Ltd. is not liable for any damage or secondary damage(s) incurred as a result of using this product, including any indirect damage.
SAFETY PRECAUTIONS (Be sure to read these precautions before using our products.)
The safety precautions are classified into categories: "Warning" and "Caution".
Depending on circumstances, procedures indicated by $\triangle \Delta$ Caution may result in serious consequences, so be sure to follow the directions for usage.
$\triangle$ Warning

## $\triangle$ Caution

Procedures which may lead to dangerous conditions and cause death or serious injury, if not carried out properly.

Procedures which may lead to dangerous conditions and cause superficial to medium injury or physical damage or may degrade or damage the product, if not carried out properly.

## Warning

- To prevent an electrical shock or fire, only Shinko or qualified service personnel may handle the inner assembly.
- To prevent an electrical shock, fire, or damage to instrument, parts replacement may only be undertaken by Shinko or qualified service personnel.

## Safety Precautions

- To ensure safe and correct use, thoroughly read and understand this manual before using this instrument.
- This instrument is intended to be used for industrial machinery, machine tools and measuring equipment. Verify correct usage after purpose-of-use consultation with our agency or main office. (Never use this instrument for medical purposes with which human lives are involved.)
- Extemal protection devices such as protective equipment against excessive temperature rise, etc. must be installed, as malfunction of this product could result in serious damage to the system or injury to personnel. Proper periodic maintenance is also required.
- This instrument must be used under the conditions and environment described in this manual. Shinko Technos Co., Ltd. does not accept liability for any injury, loss of life or damage occurring due to the instrument being used under conditions not otherwise stated in this manual.

## Caution with Respect to Export Trade Control Ordinance

To avoid this instrument from being used as a component in, or as being utilized in the manufacture of weapons of mass destruction (i.e. military applications, military equipment, etc.), please investigate the end users and the final use of this instrument. In the case of resale, ensure that this instrument is not illegally exported.

## ■ Installation Precautions

## © <br> Caution

This instrument is intended to be used under the following environmental conditions (IEC61010-1): Overvoltage category II, Pollution degree 2
Ensure the mounting location corresponds to the following conditions:

- A minimum of dust, and an absence of corrosive gases
- No flammable, explosive gases
- No mechanical vibrations or shocks
- No exposure to direct sunlight, an ambient temperature of -10 to $55^{\circ} \mathrm{C}\left(14\right.$ to $\left.131^{\circ} \mathrm{F}\right)$ that does not change rapidly, and no icing
- An ambient non-condensing humidity of 35 to $85 \%$ RH
- No large capacity electromagnetic switches or cables through which large current is flowing
- No water, oil or chemicals or the vapors of these substances can come into direct contact with the unit.
-When installing this unit within a control panel, please note that ambient temperature of this unit - not the ambient temperature of the control panel - must not exceed $55^{\circ} \mathrm{C}$ $\left(131^{\circ} \mathrm{F}\right)$. Otherwise the life of electronic components (especially electrolytic capacitor) may be shortened.

Note: Avoid setting this instrument directly on or near flammable material even though the case of this instrument is made of flame-resistant resin.

## Wiring Precautions

## . Caution

- Do not leave bits of wire in the instrument, because they could cause a fire and malfunction.
- When wiring, use a crimping pliers and a solderless terminal with an insulation sleeve in which an M3 screw fits.
- Tighten the terminal screw using the specified torque. If excessive force is applied to the screw when tightening, the screw or case may be damaged.
- This instrument does not have a built-in power switch, circuit breaker and fuse. It is necessary to install a power switch, circuit breaker and fuse near the instrument. (Recommended fuse: Time-lag fuse, rated voltage 250 V AC, rated current 2 A )
- For wiring of the AC power source, be sure to use terminals as described in this manual. If the AC power source is connected to incorrect terminals, the unit will be burnt out.
- Do not apply a commercial power source to the sensor which is connected to the input terminal nor allow the power source to come into contact with the sensor.
- When using DC voltage and current input, do not confuse polarity when wiring.
- Keep the input/output wires and power line separate.

## - Operation and Maintenance Precautions

## Caution

- Do not touch live terminals. This may cause an electrical shock or problems in operation.
- Turn the power supply to the instrument OFF when retightening the terminal or cleaning. Working on or touching the terminal with the power switched ON may result in severe injury or death due to electrical shock.
- Use a soft, dry cloth when cleaning the instrument.
(Alcohol based substances may tarnish or deface the unit.)
- As the display section is vulnerable, be careful not to put pressure on, scratch or strike it with a hard object.

Characters used in this manual $[\leqslant$ : No character is indicated (unlit).]

### 1.1 Model

## SGJ

1: Multi-rotation trimmer
2: Moisture-proof treatment
3: Multi-rotation trimmer + Moisture-proof treatment
Power supply
100 to 240 V AC
Output *2
-Input *1
Series name

## SGJW

## SGJL

*1: Input

| Code |  | Input Type |  |
| :---: | :--- | :--- | :---: |
| F0 | Open collector | 0.001 Hz to 100 kHz |  |
| F1 | Voltage pulse | 0.001 Hz to 100 kHz |  |
| F2 | Mechanical contact | 0.001 Hz to 30 Hz |  |
| F3 | Line driver | 0.001 Hz to 100 kHz |  |

*2: Output 1, Output 2

| Code | Output Type |  | Code | Output Type |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 1 | Current output | 4 to 20 mA | A | Voltage output | 0 to $10 \mathrm{mV}^{* 1}$ |
| 2 |  | 0 to $20 \mathrm{~mA}^{* 1}$ | B |  | 0 to 100 mV *1 |
| 3 |  | 0 to $16 \mathrm{~mA}^{* 1}$ | C |  | 0 to $1 \mathrm{~V}^{* 1}$ |
| 4 |  | 2 to 10 mA | D |  | 0 to $5 \mathrm{~V}^{* 1}$ |
| 5 |  | 0 to $10 \mathrm{~mA}^{* 1}$ | E |  | 1 to 5 V |
|  |  |  | F |  | 0 to $10 \mathrm{~V}^{* 1}$ |
|  |  |  | G |  | -5 to 5 V *2 |

*1: 0 V or less: Out of base accuracy
*2: Not available for the SGJW.

### 1.2 How to Read the Model Label

The model label is attached to the left side of the case.

(Fig. 1.2-1)

## 2. Name and Functions

### 2.1 Front Panel

SGJW

(Fig. 2.1-1)

| (1) | Display section | Indicates setting contents, input value, output value, etc. |
| :--- | :--- | :--- |
| (2) | Mounting screw | Used for fixing the instrument to the socket or removal from it. |
| (3) | DISP key | Switches the displays, and moves to the next setting item. <br> In Manual mode, Output 1 and Output 2 setting can be switched. <br> Releases the lock status of the DISP key by pressing for 3 seconds. |
| (4) | MODE key | Selects either a setting mode or a display mode. <br> Shifts the digit for the Custom Display. <br> Enters the setting mode by pressing and holding for 5 seconds. |
| (5) | Up key | Increases the numerical value. <br> Contents of Multi-Display A and B can be changed alternately when <br> Default Display is RUN display mode 1, 2*, 3, 4*, 5 and $6^{*}$. |
| (6) | DOWN key | Decreases the numerical value. <br> Enters Manual mode by pressing for 3 seconds. |
| (7) | Output 1 Zero | Adjusts the value of Output 1 Zero. |
| (8) | Output 1 Span | Adjusts the value of Output 1 Span. |
| (9) | Output 2 Zero* | Adjusts the value of Output 2 Zero. |
| (10) | Output 2 Span* | Adjusts the value of Output 2 Span. |

[^0]
### 2.2 Display Section

(Fig. 2.2-1)

| $\left(\begin{array}{l}\text { (1) }\end{array}\right.$ | Setting display <br> indicator A | Lights up in Manual mode. |
| :--- | :--- | :--- |
| (2) | Input indicator A | Lights up when Multi-Display A indicates an input value. |
| (3) | Alarm indicator A | Lights up if an input error or input disconnection occurs in a <br> display mode except All unlit display mode. |
| (4) | Output indicator A | Lights up when Multi-Display A indicates an output value. |
| (5) | mA indicator | Lights up when mA is selected in [Indication unit]. |
| (6) | \% indicator | Lights up in Manual mode or when \% is selected in [Indication unit]. |
| (7) | Setting display <br> indicator B | Lights up for the setting display. <br> For the SGJW, lights up for the setting display or in Manual mode. |
| (8) | Input indicator B | Lights up when Multi-Display B indicates an input value. <br> (9) |
| Alarm indicator B | Lights up if an input error or input disconnection occurs while <br> Multi-Display B indicates an input value. |  |
| (10) | Output indicator B | Lights up when Multi-Display B indicates an output value. <br> (11) <br> $\mathbf{1}$ indicator A |
| Lights up in Manual mode or when Multi-Display A indicates |  |  |
| Output 1 value. |  |  |

Output indicators A and B, Alarm indicators A and B: Red
Other indicators: White

## 3. Mounting

### 3.1 External Dimensions (Scale: mm)

8P socket (SGJ, SGJL)
11P socket (SGJW)

(Fig. 3.1-1)

## $\triangle$ Caution

- Mount the DIN rail horizontally.
- To remove the socket, a flat blade screwdriver is required.

Never turn the screwdriver when inserting it into the Lock lever. If excessive power is applied to the lever, it may break.

- If the instrument is mounted in a position susceptible to vibration or shock, mount commercially available fastening plates at both ends of the instrument.
Recommended Fastening Plate

| Manufacturer |  | Model |  |
| :--- | :--- | :--- | :---: |
| Omron Corporation | End plate | PFP-M |  |
| IDEC Corporation | Fastening plate | BNL6 |  |
| Panasonic Electric Works Co., Ltd. | Fastening plate | ATA4806 |  |

## Mounting to the DIN rail (Fig. 3.2-1)

(1) Separate the instrument from the socket by loosening the mounting screw on the front panel.
(2) Make sure the lock lever of the socket is located in the lower part of the socket. Hook the upper side of the socket onto the DIN rail, then fit the lower part of the socket onto the DIN rail (A clicking sound should be heard when done properly).

## Caution

- Before inserting the instrument to the socket, make sure the cable is wired properly. (Refer to "4. Wiring".)
- When inserting or removing the socket, make sure the socket is oriented vertically. If force is applied in any other direction than vertically, a malfunction may occur.
- If the mounting screw is fastened too tightly, a malfunction may occur.
(3) Insert the SGJ into the socket.
(4) Fasten the mounting screw by turning it clockwise, to secure the SGJ onto the socket. Tighten the screw lightly.

## Removal from the DIN rail (Fig. 3.2-2)

(1) Turn the power to the instrument OFF.
(2) Separate the instrument from the socket by loosening the mounting screw on the front panel.
(3) Insert a flat blade screwdriver into the Lock lever (lower part of the socket), and remove the socket from the DIN rail while pulling the lever down.

(Fig. 3.2-1)

## 4. Wiring

## ! Warning

Turn the power supply to the instrument off before wiring or checking. Working on or touching the terminal with the power switched on may result in severe injury or death due to electrical shock.

### 4.1 Lead Wire Solderless Terminal

Use a solderless terminal with an insulation sleeve in which an M3 screw fits as shown below. The torque should be $0.63 \mathrm{~N} \cdot \mathrm{~m}$.

| Solderless <br> Terminal | Manufacturer | Model |
| :---: | :--- | :--- |
|  | Nichifu Terminal Industries Co., Ltd. | TMEV1.25Y-3 |
|  | Japan Solderless Terminal MFG Co., Ltd. | VD1.25-B3A |
| Ring-type | Nichifu Terminal Industries Co., Ltd. | TMEV1.25-3 |
|  | Japan Solderless Terminal MFG Co., Ltd. | V1.25-3 |

(Fig. 4.1-1)

Ring-type(Scale: mm)

(Fig. 4.1-2)

### 4.2 Circuit Configuration

SGJ, SGJL

When inputting line driver, 1 and 4 terminals are line receiver and 5 terminal is signal ground.
(Fig. 4.2-1)

SGJW

When inputting line driver, 1 and 2 terminals are line receiver and 4 terminal is signal ground.
(Fig. 4.2-2)

### 4.3 Terminal Arrangement

| RS-485 | Serial communication (for SGJL) |

### 4.4 Wiring

## © Warning

- For 100 to 240 V AC, if the AC power source is connected to incorrect terminals, the instrument will be burnt out.
(1) Power Source Wiring

SGJ, SGJL: Use terminals (13), (14) for the power supply to the instrument.
SGJW: Use terminals (10), (11) for the power supply to the instrument.
(2) Output Wiring

SGJ, SGJL: Use terminals (9)(+), (12)(-) for the output wiring.
SGJW: Output 1: Use terminals $7(+)$, 8)(-) for Output 1 wiring.
Output 2: Use terminals (3)(+), (6)(-) for Output 2 wiring.
(3) Input Wiring

SGJ, SGJL: Use terminals (1), (4), (5) for the input wiring.
SGJW: Use terminals (1), (2), (4) for the input wiring.

Open collector

For the SGJL, connect the SGJL to SGJL using the provided cable.

(Fig. 4.4-9)

## 5. Display Mode

-

## Default Display:

If the MODE and DISP keys (in that order) are pressed together for approx. 3 seconds in any display mode, the display mode will become the Default Display.
Once the Default Display is set, the DISP key will be in lock status.
If the DISP key is pressed for approx. 3 seconds on the Default Display, the key lock status will be cancelled.
If the DISP key is pressed while the DISP key is in lock status, Multi-Display A indicates LEEA.

| RUN display mode 1: | Multi-Display A indicates an input value, and Multi-Display B indicates Output 1 value. |
| :---: | :---: |
| RUN display mode 2: | Multi-Display A indicates an input value, and Multi-Display B indicates Output 2 value. |
| RUN display mode 3: | Multi-Display A indicates an input value, and Multi-Display B is unlit. |
| RUN display mode 4: | Multi-Display A indicates Output 1 value, and Multi-Display B indicates Output 2 value. |
| RUN display mode 5: | Multi-Display A is unlit, and Multi-Display B indicates Output 1 value. |
| RUN display mode 6: | Multi-Display A is unlit, and Multi-Display B indicates Output 2 value. |
| Custom display mode 1 : | Multi-Display A indicates characters set in [Multi-Display A]. Multi-Display B indicates characters set in [Multi-Display B]. |
| Custom display mode 2: | Multi-Display A indicates an input value. Multi-Display B indicates characters set in [Multi-Display B]. |
| Custom display mode 3: | Multi-Display A indicates an Output 1 value. Multi-Display B indicates characters set in [Multi-Display B]. |
| Custom display mode 4: | Multi-Display A indicates an Output 2 value. Multi-Display B indicates characters set in [Multi-Display B]. |
| Unlit display mode: | Multi-Display A and B are unlit, and the Input indicator $A$ lights up. <br> Alarm indicator A lights up if they are under the conditions of lighting. |
| All unlit display mode: | All displays and indicators are unlit. <br> Alarm indicator $A$ and $B$ do not light up even if they are under the conditions of lighting. |
| Model display mode: | Multi-Display A indicates a model name, and Multi-Display B indicates an input code and output code. |

## 6. Setting Mode

### 6.1 Display Transition in Setting Mode

- ------- : Available only for the SGJW.
- . . - . $:$ Available only for the SGJL.
- If the MODE key is pressed and held down for approx. 5 seconds in each setting mode, the unit will move to the Default Display.

## 6．2 Input Setting Mode

## Frequency Range group

Selects the frequency range group．

| Setting Range | Indication |  | Factory Default |
| :---: | :---: | :---: | :---: |
|  | Multi－Display A | Multi－Display B |  |
| Ultra－low frequency | 日砍 | MHZ ${ }_{\text {\％}}$ | $\qquad$ |
| Low frequency |  |  |  |
| Frequency |  | KHZ風 |  |

## Frequency High Limit

Sets the frequency high limit．

| Setting Range | Indication |  | Factory Default |
| :---: | :---: | :---: | :---: |
|  | Multi－Display A | Multi－Display B |  |
| Ultra－low frequency 10 to 9999 mHz | 因回回 | Set value |  |
| Low frequency 1 to 9999 Hz |  |  |  |
| Frequency 1 to 100 kHz |  |  |  |

## Decimal Point Place

Selects the decimal point place．

| Setting Range | Indication |  | Factory Default |
| :---: | :---: | :---: | :---: |
|  | Multi－Display A | Multi－Display B |  |
| No decimal point | 回园 | 圆回 | No decimal point日R 圈圆 |
| 1 digit after decimal point |  | 区 |  |
| 2 digits after decimal point |  | 回回 |  |
| 3 digits after decimal point |  | 回回回 |  |

## Indication Value for Input Low Limit

Sets the indication value for input low limit．

| Setting Range | Indication |  | Factory Default |
| :---: | :---: | :---: | :---: |
|  | Multi－Display A | Multi－Display B |  |
| －1999 to Indication value for input high limit | SEEL | Set value | $\begin{gathered} 0 \\ \text { SEEX } \\ \text { 膡 } \end{gathered}$ |

## Indication Value for Input High Limit

Sets the indication value for input high limit．

| Setting Range | Indication |  | Factory Default |
| :---: | :---: | :---: | :---: |
|  | Multi－Display A | Multi－Display B |  |
| Indication value for input low limit to 9999 | SEXA | Set value | Frequency high limit <br>  |

## Indication Unit

Selects the unit for indication．

| Setting Range | Indication |  | Factory Default |
| :---: | :---: | :---: | :---: |
|  | Multi－Display A | Multi－Display B |  |
| No unit | 匈國E |  | No unit园园 NMNE |
| \％ |  | RER南 |  |
| mA |  | M同 |  |
| V |  | V®区E |  |
| ${ }^{\circ} \mathrm{C}$ |  | 区EES |  |

## Save Settings

Selects whether the settings are saved（registered）or not．

| Setting Range | Indication |  | Factory Default |
| :---: | :---: | :---: | :---: |
|  | Multi－Display A | Multi－Display B |  |
| Save | 因國E | 日ES氮 | SaveSREWF |
| Not save |  | 可匈圆 |  |

## 6．3 Output 1 Setting Mode

Output 1 Type
Selects Output 1 type．

| Setting Range | Indication |  | Factory Default |
| :---: | :---: | :---: | :---: |
|  | Multi－Display A | Multi－Display B |  |
| 4 to 20 mA | 㫙回 | 困吅团 |  |
| 0 to 20 mA |  | 吅回因 |  |
| 0 to 16 mA |  | 目回回 |  |
| 2 to 10 mA |  | 己回回 |  |
| 0 to 10 mA |  | 回圆回 |  |
| 0 to 10 mV |  | 喵葍 |  |
| 0 to 100 mV |  | 回园䍙 |  |
| 0 to 1 V |  | 回㘣呙 |  |
| 0 to 5 V |  | 囫岛 |  |
| 1 to 5 V |  |  |  |
| 0 to 10 V |  | 园回员 |  |
| -5 to 5 V ＊ |  | ＊58 |  |

＊Not available for the SGJW．

## Output 1 Decimal Point Place

Selects a decimal point place for Output 1.

| Setting Range | Indication |  | Factory Default |
| :---: | :---: | :---: | :---: |
|  | Multi－Display A | Multi－Display B |  |
| No decimal point | 回园 | W匈 | 2 digits after decimal point回圆员 |
| 1 digit after decimal point |  | 园回回 |  |
| 2 digits after decimal point |  | 回回 |  |
| 3 digits after decimal point |  |  |  |

## Indication Value at Output 0\％

Sets an indication value at the time of output 0\％．［See（Table 6．3－1）on p．20．］

| Setting Range | Indication |  | Factory Default |
| :---: | :---: | :---: | :---: |
|  | Multi－Display A | Multi－Display B |  |
| －1999 to Indication value at output 100\％ | 日57圆 | Set value |  |

## Indication Value at Output 100\％

Sets an indication value at the time of output $100 \%$ ．
［See（Table 6．3－1）on p．20．］

| Setting Range | Indication |  | Factory Default |
| :---: | :---: | :---: | :---: |
|  | Multi－Display A | Multi－Display B |  |
| Indication value at output 0\％to 9999 | 明匋 | Set value |  |

（Table 6．3－1）

| Output Range | Indication value at <br> output 0\％ | Indication value at <br> output 100\％ |
| :--- | :---: | :---: |
| 4 to 20 mA | 4.00 | 20.00 |
| 0 to 20 mA | 0.00 | 20.00 |
| 0 to 16 mA | 0.00 | 16.00 |
| 2 to 10 mA | 2.00 | 10.00 |
| 0 to 10 mA | 0.00 | 10.00 |
| 0 to 10 mV | 0.0 | 10.0 |
| 0 to 100 mV | 0.0 | 100.0 |
| 0 to 1 V | 0.00 | 1.00 |
| 0 to 5 V | 0.00 | 5.00 |
| 1 to 5 V | 1.00 | 5.00 |
| 0 to 10 V | 0.00 | 10.00 |
| -5 to 5 V | -5.0 | 5.0 |

## Shutdown Threshold Value

Sets the input value for the shutdown threshold．
If an input value is lower than this point，the value set in［Output value at shutdown］will be output．

| Setting Range | Indication |  | Factory Default |
| :--- | :---: | :---: | :---: |
|  | Multi－Display A | Multi－Display B |  |
| 0 to $10 \%$ FS | Bat | Set value | 0 |

## Output Value at Shutdown

If any inputs lower than the［Shutdown Threshold Value］are received，the value set here will be output．

| Setting Range | Indication |  | Factory Default |
| :---: | :---: | :---: | :---: |
|  | Multi－Display A | Multi－Display B |  |
| －5 to 105\％ | 50日或 | Set value |  |

## Output 1 Normal／Reverse

Selects either Normal mode or Reverse mode for Output 1 status．

| Setting Range | Indication |  | Factory Default |
| :---: | :---: | :---: | :---: |
|  | Multi－Display A | Multi－Display B |  |
| Normal | 明圆 | NGME | Normal <br>  NGME |
| Reverse |  | RER5 |  |

## Save Settings

Selects whether the settings are saved（registered）or not．

| Setting Range | Indication |  | Factory Default |
| :---: | :---: | :---: | :---: |
|  | Multi－Display A | Multi－Display B |  |
| Save | 國國E | 可岛 | $\begin{gathered} \text { Save } \\ \text { SAKE } \\ \text { BEG要 } \end{gathered}$ |
| Not save |  | N匈匈 |  |

## 6．4 Output 2 Setting Mode

Available only for the SGJW．
Output 2 Type
Selects Output 2 type．

| Setting Range | Indication |  | Factory Default |
| :---: | :---: | :---: | :---: |
|  | Multi－Display A | Multi－Display B |  |
| 4 to 20 mA | （1） | 困吅圃 |  |
| 0 to 20 mA |  | 吅回回 |  |
| 0 to 16 mA |  | 回回回 |  |
| 2 to 10 mA |  | 圆回回 |  |
| 0 to 10 mA |  | 回國因 |  |
| 0 to 10 mV |  | 回面号 |  |
| 0 to 100 mV |  | 吅园㚗 |  |
| 0 to 1 V |  | 回匈菌 |  |
| 0 to 5 V |  | 棘可 |  |
| 1 to 5 V |  | 匈芴号 |  |
| 0 to 10 V |  | 回圆或 |  |

## Output 2 Decimal Point Place

Selects the decimal point place for Output 2.

| Setting Range | Indication |  | Factory Default |
| :---: | :---: | :---: | :---: |
|  | Multi－Display A | Multi－Display B |  |
| No decimal point | 回园 | 圆回 | 2 digits after decimal point回园园 |
| 1 digit after decimal point |  | 圆回 |  |
| 2 digits after decimal point |  | 囫回回 |  |
| 3 digits after decimal point |  | 國國 |  |

## Indication Value at Output 0\％

Sets an indication value at the time of output $0 \%$ ．
［See（Table 6．4－1）on p．22．］

| Setting Range | Indication |  | Factory Default |
| :--- | :---: | :---: | :---: |
|  | Multi－Display A | Multi－Display B |  |
| －1999 to |  |  |  |
| Indication value at output 100\％ | $\boxed{\square \boxed{Z}}$ | Set value | 4．00 |

## Indication Value at Output 100\％

Sets an indication value at the time of output $100 \%$ ．
［See（Table 6．4－1）on p．22．］

| Setting Range | Indication |  | Factory Default |
| :---: | :---: | :---: | :---: |
|  | Multi－Display A | Multi－Display B |  |
| Indication value at output 0\％to 9999 |  | Set value | $\begin{gathered} 20.00 \\ \text { BSD } \\ \text { BDB } \end{gathered}$ |

（Table 6．4－1）

| Output Range | Indication value at <br> output 0\％ | Indication value at <br> output 100\％ |
| :--- | :---: | :---: |
| 4 to 20 mA | 4.00 | 20.00 |
| 0 to 20 mA | 0.00 | 20.00 |
| 0 to 16 mA | 0.00 | 16.00 |
| 2 to 10 mA | 2.00 | 10.00 |
| 0 to 10 mA | 0.00 | 10.00 |
| 0 to 10 mV | 0.0 | 10.0 |
| 0 to 100 mV | 0.0 | 100.0 |
| 0 to 1 V | 0.00 | 1.00 |
| 0 to 5 V | 0.00 | 5.00 |
| 1 to 5 V | 1.00 | 5.00 |
| 0 to 10 V | 0.00 | 10.00 |

## Shutdown Threshold Value

Sets the input value for the shutdown threshold．
If an input value is lower than this point，the value set in［Output value at shutdown］will be output．

| Setting Range | Indication |  | Factory Default |
| :---: | :---: | :---: | :---: |
|  | Multi－Display A | Multi－Display B |  |
| 0 to 10\％FS | 明园 | Set value | 0 $\square ه \underbrace{4}$ |

## Output Value at Shutdown

When any inputs lower than the［Shutdown Threshold Value］are received，the value set here will be output．

| Setting Range | Indication |  | Factory Default |
| :---: | :---: | :---: | :---: |
|  | Multi－Display A | Multi－Display B |  |
| －5 to 105\％ | 5日可膡 | Set value |  |

## Output 2 Normal／Reverse

Selects either Normal mode or Reverse mode for Output 2 status．

| Setting Range | Indication |  | Factory Default |
| :---: | :---: | :---: | :---: |
|  | Multi－Display A | Multi－Display B |  |
| Normal | －FEDE | NGME | Normal 日FRD <br> NOME |
| Reverse |  | RER5 |  |

## Save Settings

Selects whether the settings are saved（registered）or not．

| Setting Range | Indication |  | Factory Default |
| :---: | :---: | :---: | :---: |
|  | Multi－Display A | Multi－Display B |  |
| Save | SAVE |  | SaveSRVE GES |
| Not save |  | N口岡岡 |  |

## 6．5 Instrument Setting Mode

## Indication Time

Sets duration from no operation until indication（of Multi－Display A，Multi－Display B， and each action indicator）turns off．
They remain lit during setting mode or in the event of an input error．
When set to 00．00，they remain lit．
After indication time has elapsed，and if any key is pressed while they are unlit， they will light up again．

| Setting Range | Indication |  | Factory Default |
| :---: | :---: | :---: | :---: |
|  | Multi－Display A | Multi－Display B |  |
| 00 ： 00 to 60 ： 00 （Minutes ：Seconds） 00 ： 00 $\qquad$ Continuous 00 ： 01 to 60 ：00．．Indication time | EXME | Set value | $\begin{gathered} 30: 00 \\ \text { (Minutes: } \\ \text { Seconds) } \\ \text { ERME } \\ \text { BDED } \end{gathered}$ |

## Auto／Manual

If AUTO is selected，the output value will be output corresponding to the input value． When MANUAL is selected，the unit can enter Manual mode．The output value set in Manual mode will be output．

| Setting Range | Indication |  | Factory Default |
| :---: | :---: | :---: | :---: |
|  | Multi－Display A | Multi－Display B |  |
| Auto | MR尺S | 用或河 | Manual |
| Manual |  | MAN0 | MAN回 |

## Manual Mode Auto Return Time

Sets duration from manual mode until the unit automatically returns to the Default Display．
If set to 0 （zero），auto return will not occur．

| Setting Range | Indication |  | Factory Default |
| :--- | :---: | :---: | :---: |
|  | Multi－Display A | Multi－Display B |  |
| 0 to 60 minutes | MEFE | Set value | 30 minutes |
|  | MFE |  |  |

## Save Settings

Selects whether the settings are saved（registered）or not．

| Setting Range | Indication |  | Factory Default |
| :---: | :---: | :---: | :---: |
|  | Multi－Display A | Multi－Display B |  |
| Save | 明吅区 | YES | Save |
| Not save |  | 旬可 | WES |

## 6．6 Communication Setting Mode

Available only for the SGJL．

## Instrument Number

Sets an instrument number．

| Setting Range | Indication |  | Factory Default |
| :---: | :---: | :---: | :---: |
|  | Multi－Display A | Multi－Display B |  |
| 1 to 247 | EMND | Set value | $\begin{gathered} 1 \\ \text { EMND } \end{gathered}$ |

## Communication Speed

Selects the communication speed．

| Setting Range | Indication |  | Factory Default |
| :---: | :---: | :---: | :---: |
|  | Multi－Display A | Multi－Display B |  |
| 9600 bps | －M $\underbrace{\text { P }}$ | 囫可 | $\begin{gathered} 38400 \mathrm{bps} \\ \text { NMSR } \\ \text { WBM } \end{gathered}$ |
| 19200 bps |  | 風可已 |  |
| 38400 bps |  | 匀回 |  |

## Data bit／Parity

Selects data bit and parity．

| Setting Range | Indication |  | Factory Default |
| :---: | :---: | :---: | :---: |
|  | Multi－Display A | Multi－Display B |  |
| 8 bits／No parity | EMFE | 脸気 | 8 bits／Odd EMFE日狍百 |
| $8 \mathrm{bits} / \mathrm{Even}$ |  | BEVN |  |
| 8 bits／Odd |  | 昭日 |  |

## Stop Bit

Selects stop bit．

| Setting Range | Indication |  | Factory Default |
| :---: | :---: | :---: | :---: |
|  | Multi－Display A | Multi－Display B |  |
| 1 bit | －M5E | 圆岡 |  |
| 2 bits |  | 园已 |  |

## Response Delay Time

Response from the instrument can be delayed after receiving command from the host computer．

| Setting Range | Indication |  | Factory Default |
| :---: | :---: | :---: | :---: |
|  | Multi－Display A | Multi－Display B |  |
| 0 to 1000 ms | 区M岛 | Set value | 10 ms <br>  |

## Save Settings

Selects whether the settings are saved（registered）or not．

| Setting Range | Indication |  | Factory Default |
| :---: | :---: | :---: | :---: |
|  | Multi－Display A | Multi－Display B |  |
| Save | 5成E |  | $\begin{gathered} \text { Save } \\ \text { GHVE } \\ \text { BES } \end{gathered}$ |
| Not save |  | 葍可國 |  |

## 6．7 Custom Display Setting Mode

Customizes characters to be indicated on the Multi－Display A and B（＊）．
Use alphanumeric characters and symbols．
（e．g．）FLOW，TEMP，No．1，No． 2
$\left(^{*}\right)$ Number of characters which can be indicated differs depending on the display mode．
Refer to Section＇5．Display Mode＇（pp．13，14）．
－If Custom display mode 1 is selected：
Up to 8 characters can be displayed in total for both Multi－Display A and B．
－If any of Custom display mode 2 to 4 is selected：
Up to 4 characters can be displayed on the Multi－Display B．
Can be set from the thousands digit of the display．
Digits can be selected with the MODE key．

## Multi－Display A

Characters for the Multi－Display A can be customized．

| Setting Range | Indication |  | Factory Default |
| :---: | :---: | :---: | :---: |
|  | Multi－Display A | Multi－Display B |  |
| A to Z， 0 to 9，I，－，．，（Blank） | 明回回 | Set value | $\begin{aligned} & \text { AAAA } \\ & \text { 明明 } \\ & \text { 吅回 } \end{aligned}$ |

## Multi－Display B

Characters for the Multi－Display B can be customized．

| Setting Range | Indication |  | Factory Default |
| :---: | :---: | :---: | :---: |
|  | Multi－Display A | Multi－Display B |  |
| A to Z， 0 to 9，／，－，．，（Blank） | 明回 | Set value | $\begin{aligned} & \text { AAAA } \\ & \text { 明明 } \\ & \text { 阴回 } \end{aligned}$ |

## Save Settings

Selects whether the settings are saved（registered）or not．

| Setting Range | Indication |  | Factory Default |
| :---: | :---: | :---: | :---: |
|  | Multi－Display A | Multi－Display B |  |
| Save | 5REE | 8ES | $\begin{gathered} \text { Save } \\ \text { SREE } \\ \text { BESW } \end{gathered}$ |
| Not save |  | 回园 |  |

## 6．8 Manual Mode

If MANUAL is selected in［Auto／Manual］in Instrument setting mode，press the DOWN key for 3 seconds．The unit can enter Manual mode．
At this time，Multi－Display A indicates Output 1 value，and Multi－Display B indicates Output 2 value．
The output value can be set by the UP or DOWN key．
The output value will be lit while setting．
By pressing the DISP key，the desired output can be selected．and the desired output flashes．
By pressing the MODE key in Manual mode，or after Manual mode auto return time has elapsed，the unit returns to the Default Display，and outputs the output value corresponding to the input value．

## 7. Adjustment

Performs the output zero and span adjustments.
For this instrument, the output adjustment has already been completed when shipped.
If the instrument is used with the ordered Input/Output spec, the adjustment is not required.
However, for calibration, or for the fine adjustment of the SGJ to which any equipment is connected, perform the adjustment.

Connect a pulse generator to the input terminals of this instrument.
Connect a digital multimeter to the output terminals.

### 7.1 Basic Operation of Adjustment

Use the following trimmers on the front panel for adjustment.
Output 1 Zero: Adjusts the value of Output 1 Zero.
Output 1 Span: Adjusts the value of Output 1 Span.
Output 2 Zero: Adjusts the value of Output 2 Zero. (for SGJW)
Output 2 Span: Adjusts the value of Output 2 Span. (for SGJW)

### 7.2 Adjustment

### 7.2.1 Output 1 Adjustment

The following outlines the procedure for Output 1 adjustment.
(1) Enter the value corresponding to output $0 \%$, and adjust the value using the 'Output 1 Zero' trimmer while viewing the output value (on the digital multimeter).
(2) Enter the value corresponding to output $100 \%$, and adjust the value using the 'Output 1 Span' trimmer while viewing the output value (on the digital multimeter).
(3) Enter the value corresponding to output $0 \%$ again, and confirm the output value (on the digital multimeter).
(4) If the value corresponding to output $0 \%$ is not at $0 \%$, repeat steps (1) to (3) again.

### 7.2.2 Output 2 Adjustment

The procedure for Output 2 adjustment is the same as that of Output 1 adjustment. Use Output 2 Zero and Span trimmers for adjustment.

## 8. Operation

### 8.1 Indication after Power-on

After the power is turned on, the instrument is switched to warm-up status for 3
seconds. Multi-Display A indicates a model name, and Multi-Display B indicates the input code (for the thousands and hundreds digits), output 1 code (for the tens digit) and output 2 code (for the ones digit).
(e.g.) SGJW-F011-0-0

A value corresponding to input $0 \%$ will be output for Output 1 and Output 2.

### 8.2 Operation

After warm-up status, the unit enters display mode.
The input signal selected in [Input type] will be converted to the output selected in [Output 1 type] and [Output 2 type].

### 8.2.1 Input Indication Range

The measured value is indicated within the following range:
[Indication value for Input low limit] to
[Indication value for Input high limit + (Indication value for Input high limit Indication value for Input low limit) x 10\%]
For a value higher than 10000, the lower 4 digits will flash.
When exceeding the indication range, 团 will flash.
If pulse is absent, 0 (zero) will flash.
The placement of the decimal point follows the selection.

### 8.2.2 Indication Range of Output 1 and Output 2

The output value is indicated within the following range:
[Indication value at output 0\% - (Indication value at output 100\% - Indication value at output $0 \%$ ) $\times 10 \%$ ] to
[Indication value at output 100\% + (Indication value at output 100\% - Indication value at output 0\%) x 10\%]

However, for a value higher than (and including) 10000, the lower 4 digits will flash. (The placement of the decimal point follows the selection.)

### 8.2.3 Indication Time

After the preset indication time has elapsed, Multi-Display A, Multi-Display B and each action indicator are turned OFF. They light up again if any key is pressed.
They remain lit in setting mode or in the event of an input error.
If the indication time is set to 00:00, they will remain lit.

### 8.2.4 Detecting Unconnected Sensor

If pulses are not detected during the detection time-out below, the input will default to the initial status $(0 \mathrm{~Hz})$.
Multi-Display A or B will flash 0 (zero) when it indicates an input value.
Detection time-out: Ultra-low frequency: 1000 seconds
Low frequency: 100 seconds
Frequency: 1 second

## 9. Specifications

Input Specifications

| Open collector | Frequency range: 0.001 Hz to 100 kHz <br> Minimum pulse width: $4 \mu \mathrm{~s}$ minimum. (for both ON and OFF) <br> Detecting voltage/current: Approx. $12 \mathrm{~V} / 4 \mathrm{~mA}$ <br> Detecting level: $\quad$ At ON: $200 \Omega$ max. $/ 0.8 \mathrm{~V}$ max. <br> At OFF: $100 \mathrm{k} \Omega$ minimum. $/ 11 \mathrm{~V}$ minimum. |
| :---: | :---: |
| Voltage pulse |  |
| Mechanical contact | Frequency range: 0.001 Hz to 30 Hz <br> Minimum pulse width: 10 ms minimum. (for both ON and OFF) <br> Action input condition: At ON: $200 \Omega$ max. <br> At OFF: $100 \mathrm{k} \Omega$ minimum. |
| Line driver | Frequency range: 0.001 Hz to 100 kHz <br> Receiver: $\mathrm{RS}-422$ compliant <br> Minimum pulse width: $5 \mu \mathrm{~s}$ minimum. (for both ON and OFF) <br> Waveform: Square |

## Output 1 Specifications

| Direct current | Output Range | Allowable load resistance | Zero adjustment range | Span adjustment range |
| :---: | :---: | :---: | :---: | :---: |
|  | 4 to 20 mA | $750 \Omega$ max. | -5 to $5 \%$ | 95 to 105\% |
|  | 0 to $20 \mathrm{~mA}^{*}$ | $750 \Omega$ max. |  |  |
|  | 0 to 16 mA * | $900 \Omega$ max. |  |  |
|  | 2 to 10 mA | $1500 \Omega$ max. |  |  |
|  | 0 to 10 mA * | 1500 ת max. |  |  |
|  | * 0 mA or less: Out of base accuracy |  |  |  |
| DC voltage |  | Allowable load |  |  |
|  | Output Range | resistance | ment range | ment range |
|  | 0 to 10 mV *1 | $10 \mathrm{k} \Omega$ minimum. | -5 to $5 \%$ | 95 to 105\% |
|  | 0 to 100 mV *1 | $100 \mathrm{k} \Omega$ minimum. |  |  |
|  | 0 to $1 \mathrm{~V}^{* 1}$ | $1000 \Omega$ minimum. |  |  |
|  | 0 to $5 \mathrm{~V}^{* 1}$ | $5000 \Omega$ minimum. |  |  |
|  | 1 to 5 V | $5000 \Omega$ minimum. |  |  |
|  | 0 to $10 \mathrm{~V}^{* 1}$ | $10 \mathrm{k} \Omega$ minimum. |  |  |
|  | -5 to 5 V *2 | $10 \mathrm{k} \Omega$ minimum. |  |  |
|  | *1: 0 V or less: Out of base accuracy *2: Not available for the SGJW. |  |  |  |

Output 2 Specifications

| Direct current | Output Range | Allowable load resistance | Zero adjustment range | Span adjustment range |
| :---: | :---: | :---: | :---: | :---: |
|  | 4 to 20 mA | $750 \Omega$ max. | -5 to 5\% | 95 to 105\% |
|  | 0 to 20 mA * | $750 \Omega$ max. |  |  |
|  | 0 to $16 \mathrm{~mA}^{*}$ | $900 \Omega$ max. |  |  |
|  | 2 to 10 mA | $1500 \Omega$ max. |  |  |
|  | 0 to 10 mA * | 1500 Q max. |  |  |
|  | * 0 mA or less: Out of base accuracy |  |  |  |
| DC voltage |  | Allowable load |  |  |
|  | Output Range | resistance | ment range | ment range |
|  | 0 to 10 mV * | $10 \mathrm{k} \Omega$ minimum. | -5 to 5\% | 95 to 105\% |
|  | 0 to 100 mV * | $100 \mathrm{k} \Omega$ minimum. |  |  |
|  | 0 to 1 V * | $1000 \Omega$ minimum. |  |  |
|  | 0 to 5 V * | $5000 \Omega$ minimum. |  |  |
|  | 1 to 5 V | $5000 \Omega$ minimum. |  |  |
|  | 0 to 10 V * | $10 \mathrm{k} \Omega$ minimum. |  |  |
|  | * 0 V or less: Out of base accuracy |  |  |  |

## Performance

| Base accuracy (at $\mathbf{2 5}{ }^{\circ} \mathrm{C}$ ) | $\pm 0.1 \%$ of each input span |
| :--- | :--- |
| Temperature coefficient | $\pm 0.015 \% /{ }^{\circ} \mathrm{C}$ |
| Response time | $(250 \mathrm{~ms}+$ Pulse cycle + Output value update cycle + <br> Frequency sampling period) max. |
| Output value update <br> cycle | 125 ms |
| Indication accuracy | Base accuracy $\pm 1$ digit |

## General Structure

| Dimensions | $22.5 \times 89 \times 70 \mathrm{~mm}$ (W x H x D) |
| :--- | :--- |
| Weight | 1 output: Approx. 80 g (excluding socket) <br> 2 outputs: Approx. 90 g (excluding socket) |
| Mounting | DIN rail |
| Case | Flame-resistant resin, Color: Black |
| Front panel | Polycarbonate |

## Installation Specifications

| Power supply | 100 to $240 \mathrm{~V} \mathrm{AC} 50 / 60 \mathrm{~Hz}$ |
| :--- | :--- |
| Allowable voltage range | 85 to 264 V AC |
| Power consumption | SGJ: Approx. 9 VA <br> SGJW: Approx. 12 VA <br> SGJL: Approx. 10 VA |
| Ambient temperature | -10 to $55^{\circ} \mathrm{C}$ (Non-condensing, no icing) |
| Ambient humidity | 35 to $85 \%$ RH (Non-condensing) |

Serial Communication (for SGJL)

| Operation from an <br> external computer | Reading and setting of various set values <br> Reading of the input value and action status <br> Function change |
| :--- | :--- |
| Communication line | EIA RS-485 |
| Communication <br> method | Half-duplex communication |
| Communication <br> speed | $9600,19200,38400$ bps (Selectable by keypad) <br> (Factory default: 38400 bps) |
| Synchronization <br> method | Start-stop synchronization |
| Communication <br> protocol | Modbus RTU |
| Start bit | 1 bit |
| Data bit | 8 bits |
| Parity | Even/Odd/No parity (Selectable by keypad) <br> (Factory default: Odd) |
| Stop bit | 1 bit or 2 bits (Selectable by keypad) <br> (Factory default: 1 bit) |
| Response delay <br> time | Response from the instrument can be delayed after <br> receiving command from the host computer. <br> 0 to 1000 ms (Factory default: 10 ms) |

## Standard Function

| Power failure <br> countermeasure | The setting data is backed up in the non-volatile IC memory. |
| :--- | :--- |
| Self-diagnosis | The CPU is monitored by a watchdog timer, and if an abnormal <br> status occurs, the instrument is switched to warm-up status, <br> turning all outputs OFF. |

## 10．Troubleshooting

10．1 Indication

| Problem | Possible Cause | Solution |
| :---: | :---: | :---: |
| 团 flashes when Multi－Display A or B indicates an input value． | Input signal source may be disconnected． | Check the input signal source． |
| Multi－Display A or B flashes $\square$ when Multi－Display A or B indicates an input value． | The sensor may be disconnected． | Replace with a new sensor． |
|  | Check whether the sensor is securely mounted to the input terminals of this instrument． | Connect the sensor terminals to the instrument input terminals securely． |
|  | If pulses are not detected for a fixed time， $\mathbb{V E D}^{\square}$ will flash． Input signal source may be disconnected． | Check the input signal source． |
| 4－ditgits are flashing． | If a value higher than（and including） 10000 is entered， the lower 4 digits will flash． | Check the input signal source． |
| Multi－Display A or B is irregular or unstable when it indicates an input value． | There may be equipment that interferes with or makes noise near the instrument． | Keep the instrument clear of any potentially disruptive equipment． |
| Displays and indicators are unlit． <br> If any key is pressed， they will light up． | The Indication Time（p．25）is set to any value other than $00: 00$. <br> （Factory default is $30: 00$ ．） | To indicate continuously， set the Indication Time （p．25） to＂ $00: 00$＂． |

## 10．2 Key Operation

| Problem | Possible Cause | Solution |
| :--- | :--- | :--- |
| If the DISP key is | The DISP key is in locked | Press the DISP key for approx． |
| pressed，Multi－Display A | status． | 3 seconds to release the key |
| indicates |  | lock． |
| CDCN，and the display |  |  |
| mode cannot be switched． |  |  |

10.3 Operation

| Problem | Possible Cause | Solution |
| :--- | :--- | :--- |
| When Multi-Display A or B <br> indicates an input value, <br> the input value does not <br> change. | The sensor may be out of <br> order. | Replace with the new <br> sensor. |
|  | Check whether input and <br> output wires are securely <br> connected to the I/O <br> terminals of the instrument. | Ensure that input and output <br> wires are securely <br> connected to the I/O <br> terminals of the instrument. |
|  | Check whether the wiring of |  |
| input and output are correct. |  |  | Wire them correctly. 0

## 11．Character Table

Please use the following factory default values for your reference．
Display mode

| Setting Item | Multi－Display A | Multi－Display B | Data |
| :---: | :---: | :---: | :---: |
| Default Display mode | Follows currently indicated display mode． |  |  |
| RUN display mode 1 | Input value | Output 1 value |  |
| RUN display mode 2 ＊ | Input value | Output 2 value |  |
| RUN display mode 3 | Input value | Unlit |  |
| RUN display mode 4＊ | Output 1 value | Output 2 value |  |
| RUN display mode 5 | Unlit | Output 1 value |  |
| RUN display mode 6 ＊ | Unlit | Output 2 value |  |
| Custom display mode 1 | 用同目 | 用田因 |  |
| Custom display mode 2 | Input value | 同同回 |  |
| Custom display mode 3 | Output 1 value | 同日曲 |  |
| Custom display mode 4 ＊ | Output 2 value | 同同 |  |
| Unlit display mode | Unlit | Unlit |  |
| All unlit display mode | Unlit | Unlit |  |
| Model display mode | Model | Input，Output codes |  |

＊Available only for the SGJW．

## Setting mode

| Setting Item | Multi－Display A | Multi－Display B | Data |
