Settings

Function keys

- (1) UP Key: Increases a numerical value.
- (2) DOWN Key: Decreases a numerical value.
- (3) MODE Key: Selects a setting mode.
- (4) SUB-MODE Key: Re-lights displays. (UP Key, DOWN Key or MODE Key also re-lights displays.)

Displays and Indicator

Input display: Indicates the input value.
 Indication of -200.0 or less (ranges with decimal point):
 The minus (-) sign and input value light alternately.
 Under range: -10% of input span or less:
 " _ _ _ _ " flashes on the Input display.
 Over range: 110% of input span or more:
 " _ _ _ _ " flashes on the Input display.
 Warm-up indication: The CH1 input type is displayed on the Input display, CH2 input type is displayed on the Set value display for 3 sec after power is turned ON.
 Set value display: Alarm 1 (A1), Alarm 2 (A2), Alarm 3 (A3) values are indicated (follows the selection in "Display selection").
 If the UP Key is pressed for 1 second during alarm value indication, alarm values will be switched thus.
 (A1 → A2 → A3 → A1).
 When power is turned ON, A1 value is indicated.
 When alarm output is ON, the relevant CH1/CH2 indicator with the alarm ON flashes, and "AL" and the value selected in [Display selection] are alternately indicated on the Set value display. If the UP Key is pressed together with the DOWN Key in the above status, the alarm output currently being turned ON will be displayed.

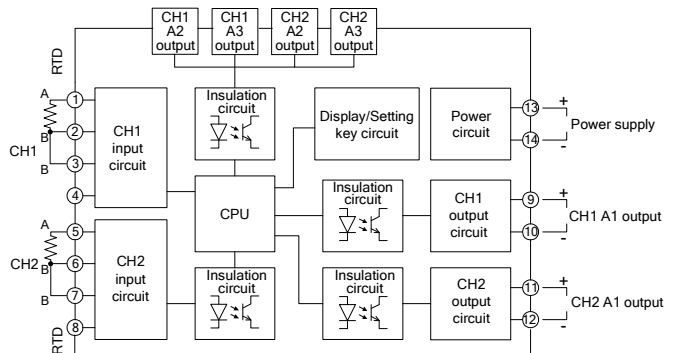

(E.g.) If CH1 Alarm 1 and CH2 Alarm 3 outputs are ON, "1-A1" and "2-A3" are displayed in order.

Power indicator (green): Lit when power is turned ON.
 CH1 indicator (yellow): Lit when CH1 is selected in [Display selection].
 CH2 indicator (yellow): Lit when CH2 is selected in [Display selection].
